

QUALITY POLICY

“Excellent quality that exceeds industry standards.”

DGI Doedijns designs, manufactures and delivers custom-made, engineered hydraulic and pneumatic solutions for the a wide variety of industries, like the oil & gas, offshore, renewable energy and heavy industry.

We can provide the complete project management and worldwide maintenance and repair services from our local offices. In addition we closely work together with A-brand components manufacturers and are, within selected regions, distributor of a wide range of high quality hydraulic, pneumatic and control components.

Quality is of great importance to DGI Doedijns. We have an established Quality Management System that sets the standard within the company and is integrated in all our business activities.

We are committed to:

- establish a save and stimulating work environment
- exceed industry standards and customer expectations
- remain our strong reputation
- achieve mutual profitability
- establish a long term relationship with our clients and suppliers
- continuous improvement of our Quality Management System

We accomplish this through:

- market driven product and process innovation
- risk management and open dialogues with our clients and suppliers
- compliance with the ISO9001 standard and other relevant certificates
- keeping employees involved with the Quality Management System
- excellent leadership and career opportunities
- sharing expertise and information and working together as a team
